

Corporate Directors Security Workshop

"Ninety percent of directors participating in our latest governance survey indicated they would like to improve their understanding of cybersecurity risk,"

said Ken Daly,
National Association of
Corporate Directors
President and CEO

OutSecure Inc

ABSTRACT

Corporate boards need to ensure that management is fully engaged in developing defense and response plans to current cybersecurity threats – or risk putting their company's core assets at considerable risk.

OutSecure Inc

A Cyber Security Strategy Creation Company

"After a series of high-profile data breaches and warnings, corporate boards are waking to cyber threats, grappling with security issues they once relegated to technology experts"

Wall Street Journal

Helping
Companies Navigate
the Cyber Threat Landscape

CYBER THREATS POSE A CRITICAL THREAT TO COMPANIES. HOWEVER, COMPANIES CONTINUE TO TREAT THESE THREATS SOLELY AS TECHNOLOGICAL AND ENTRUST THE CYBERSECURITY PROTECTION TO IT

To survive, Enterprises have to recognize the cyber threat risks as an enterprise risk management issue and how they can severely impact their business. In addition the focus is shifting from internal enterprise to an interconnected, integrated and interdependent business ecosystem with a shift in creation and sharing of data. A paradigm shift in the exposure of data.

CYBER THREATS TAKE MANY FORMS, AND THE RESPONSE TO THOSE THREATS IS NOW A MANAGEMENT-LEVEL RESPONSIBILITY

What are the implications for the boardroom? How can directors effectively oversee cybersecurity risk, the necessary processes and policies to protect sensitive networks, systems, and data from unauthorized access or attack, and the potential for financial and legal problems created by cyber threats?

PARTICIPATE IN THIS WORKSHOP TO UNDERSTAND THE CHALLENGES AND SOLUTIONS AS THEY RELATE TO YOUR CONTEXT.

BOARDS CYBERSECURITY WORKSHOP

This short yet intense session will introduce Executives to Cyber Security and help to recognize critical risks in their environments.

1. Review cyber attackers profiles, motivations and approaches
2. Understand the board's responsibilities in Enterprise Risk Oversight, management framework and Governance around information security.
3. Examine the relevance of the SEC guidance around corporation's disclosure obligations with respect to cybersecurity risks and incidents.
4. Most importantly examine the full context of Information Security – illustrate why it is a business issue and not a technology issue. If companies don't recognize that it can seriously impact bottom lines and future prospects.
5. Analyze the elements of a good Cyber Risk Dashboard and understand what security metrics to seek from management

About the trainer : PAMELA GUPTA

is President of OutSecure Inc.
