

THE RISK MANAGEMENT COMPANY

WE OPTIMIZE AND SECURE YOUR BUSINESS

Optimit
We optimize and secure your business

OUR VISION/ MISSION

We are the Risk Management Company. Managing your risks is what we do. We empower your risk management team and optimize your business. Not only by giving strategic risk management advice, but also by committing ourselves to being your partner in an impeccable implementation. Our worldwide clients are both private and public organizations in diverse sectors seeking a top partner that can deliver solutions in Risk Management in general and in specific domains such as security risk management, which is one of our fields of expertise.

How do we manage your project?

>>>

By ensuring you a good flight.

Our Project Management service involves mapping out our flight plan. Before departure, we want to be sure that we fully understand your company and your needs. Once we're on the same wavelength, we're ready to take off! Flying high, aiming for the sky and at any time assuring you a safe landing.

A multidisciplinary crew

With an experienced captain in the cockpit and a well-trained co-captain at his side, a customer-friendly cabin crew and our expert technicians, our team is truly up to any challenge.

How do we accomplish that time and again?

In order to reach our destination with you, we follow our Code 0. This code stands for the values we comply with.

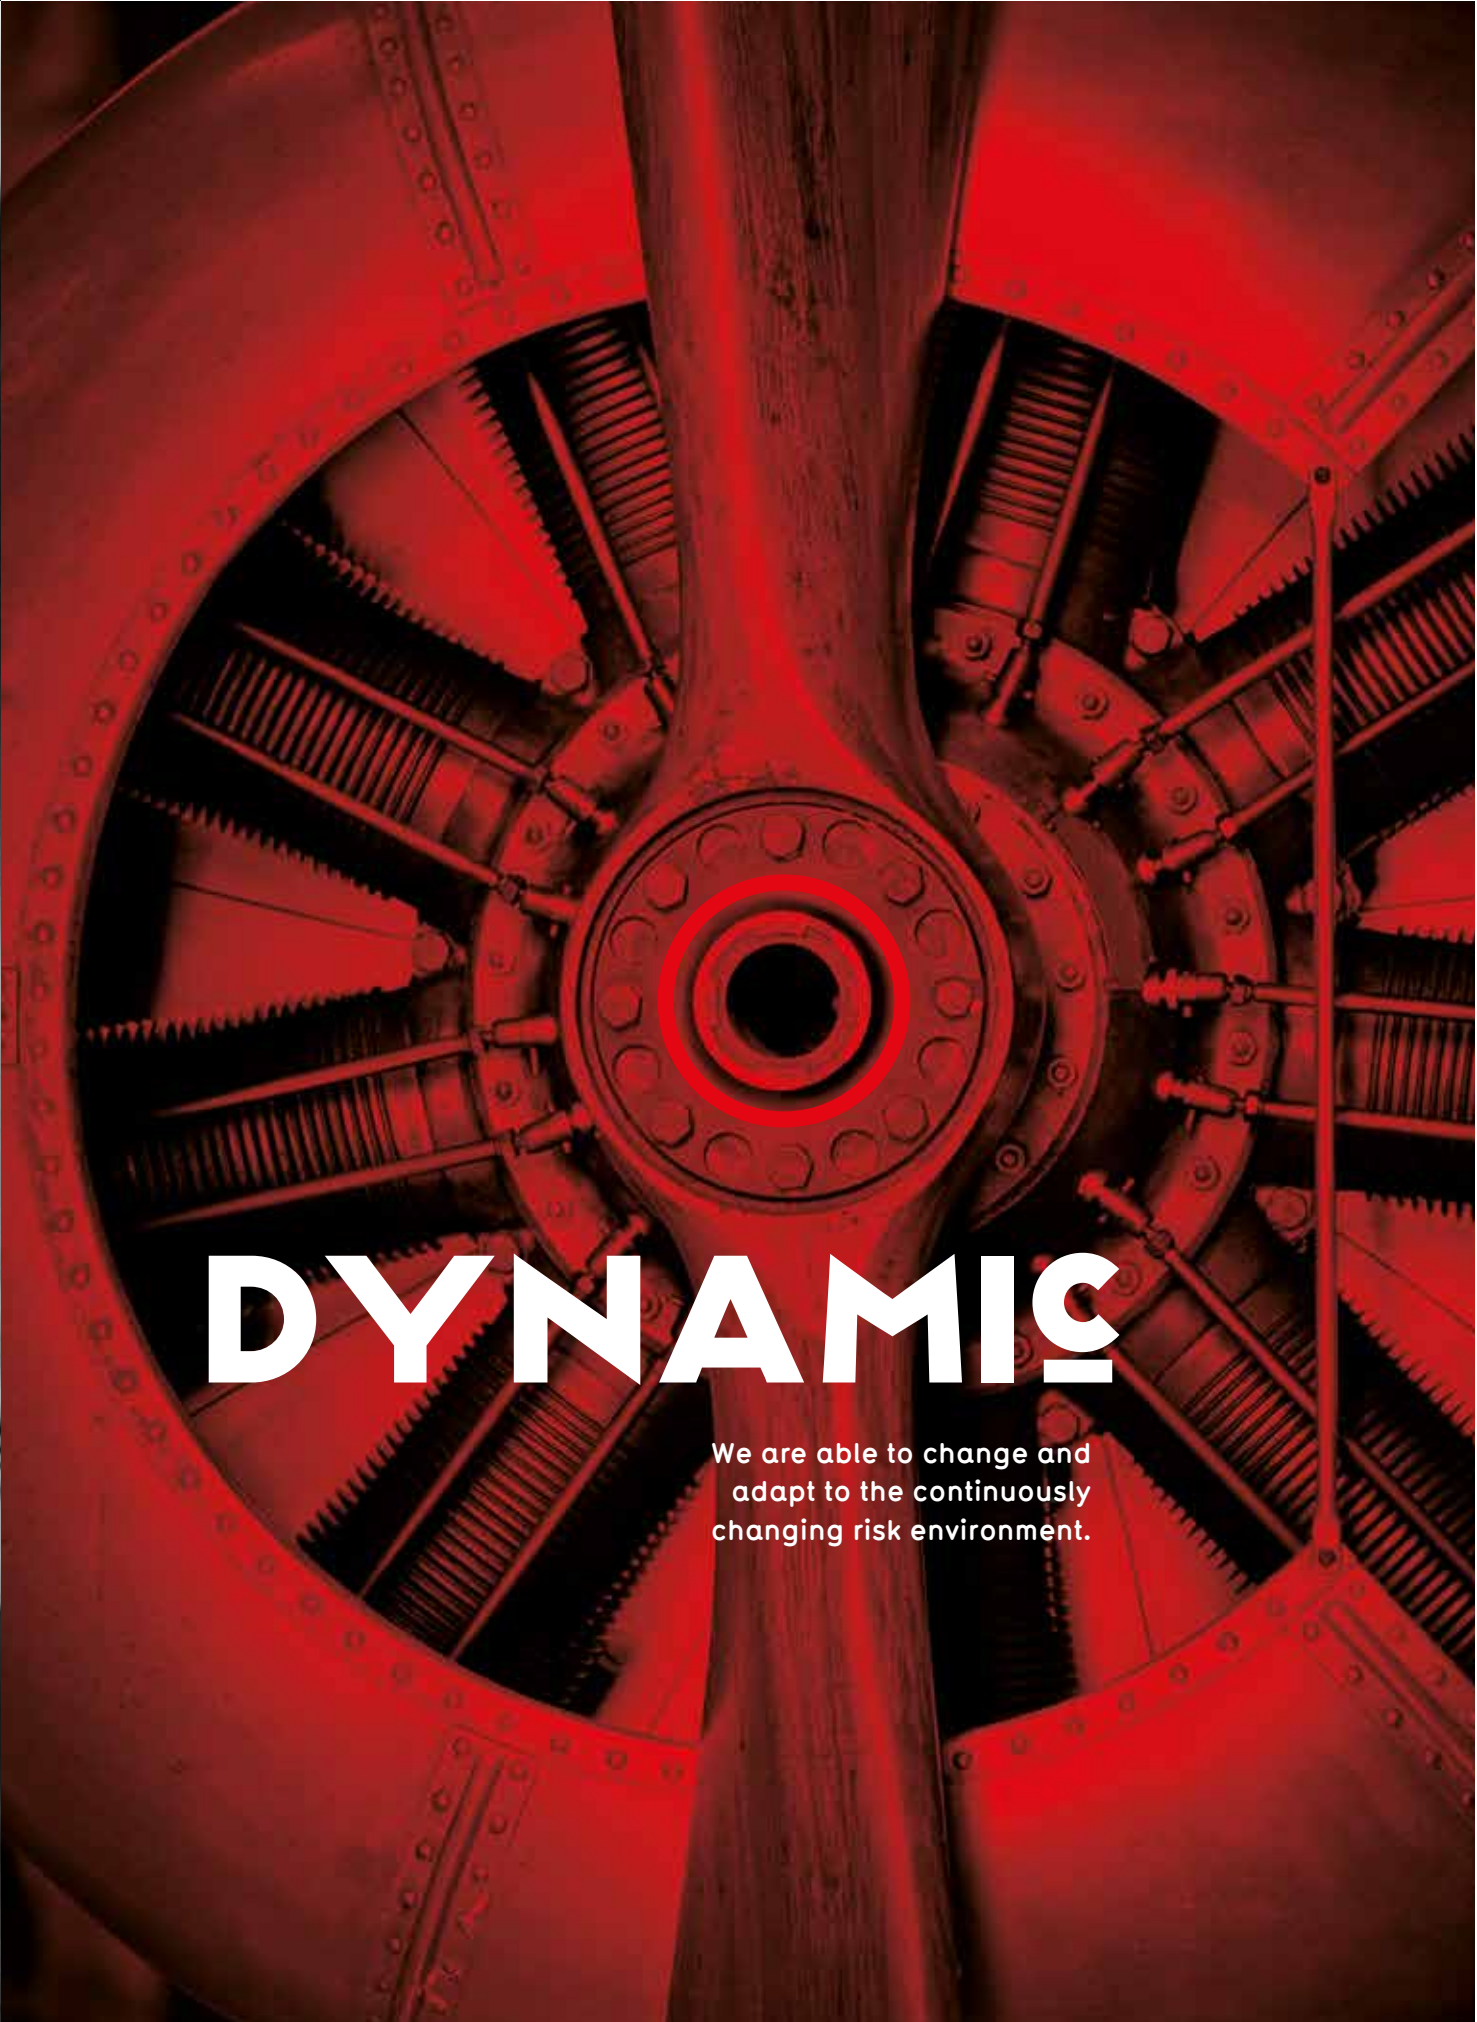

CONFIDENTIALITY

Hear, see and be silent. Optimit has a strict company policy about confidentiality. Optimit employees have security clearance.

OWNERSHIP

We take ownership of the projects you entrust to us, we respect deadlines and budget and are only satisfied when you are...

DYNAMIC

We are able to change and adapt to the continuously changing risk environment.

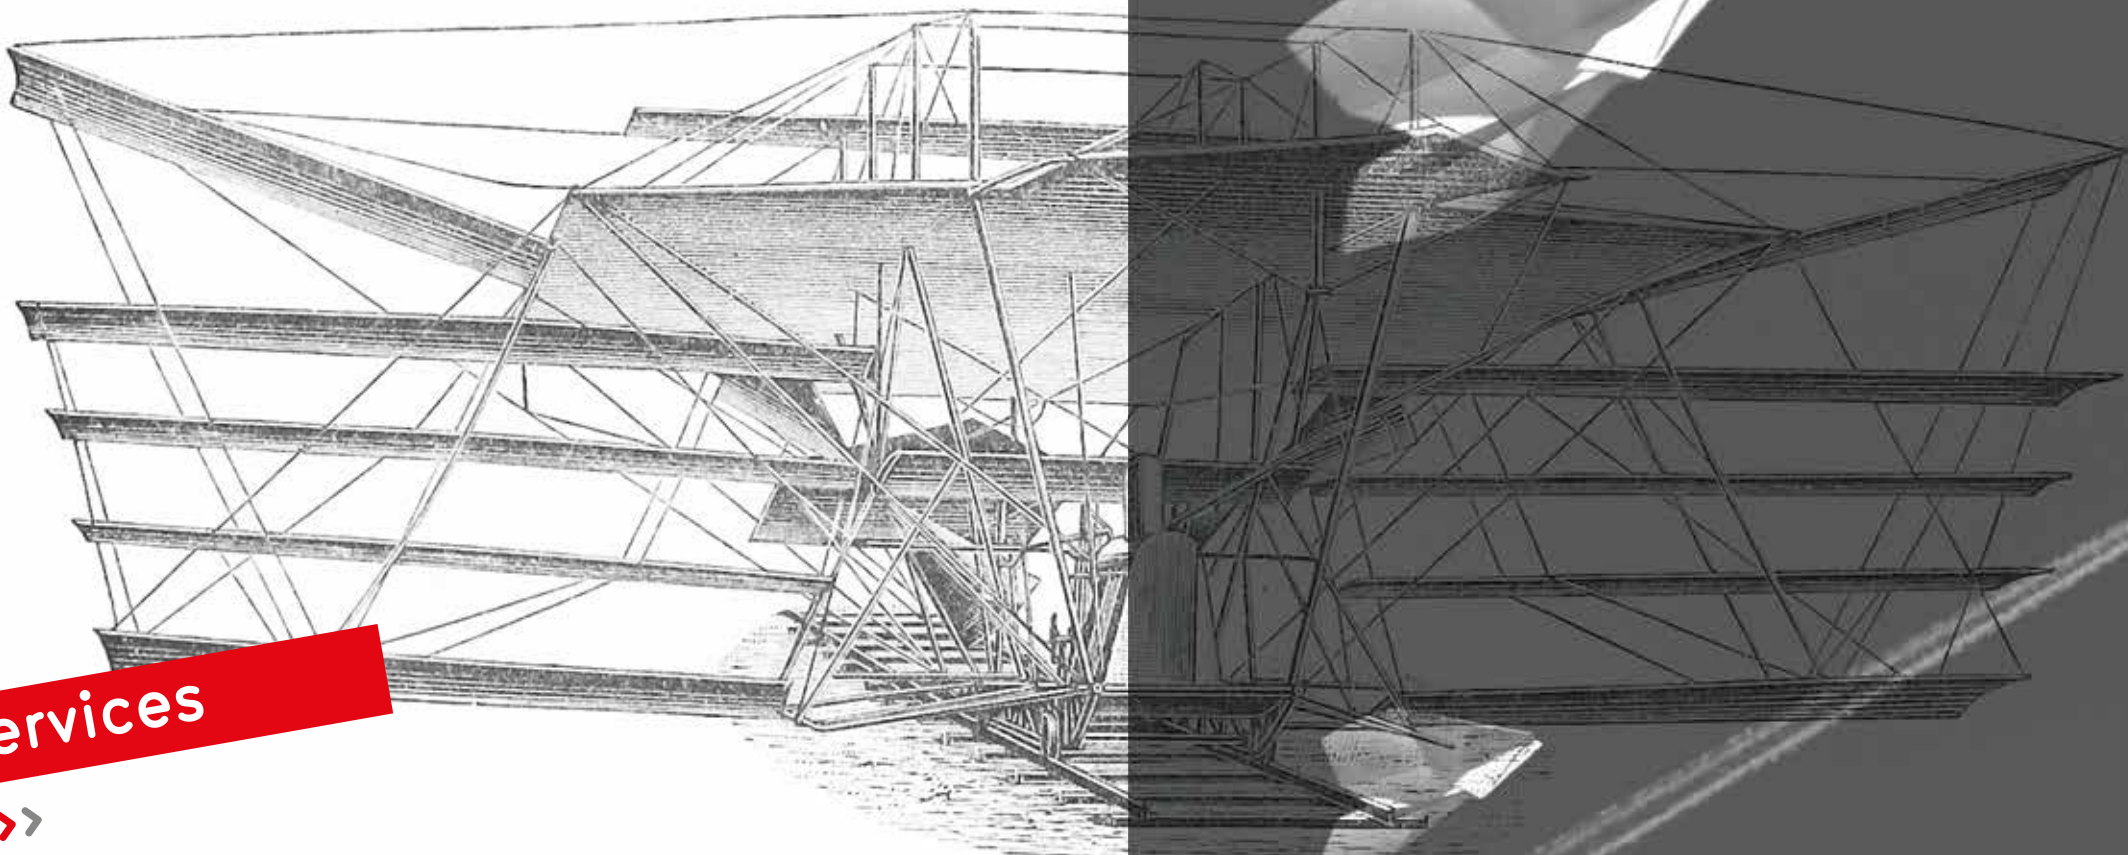

EMPATHY

We base our solutions on your specific situation and threats. We think along with you.

OPTIMISM

The word Optimism is originally derived from the Latin 'Optimum', meaning "best." Optimist strives to be the best in all aspects of risk management.

services

Providing a full range of services, Optimit not only gives independent Advice and Consultancy on all aspects of security. We also have a specialized service providing Education and Training tailored to your needs.

Last but not least, our Engineering service can identify, design, give guidance to tender or support with Project Management.

**Security Path Analyzer**

Critical-Path Analysis of a site by identifying the critical targets as well as identifying, characterizing & assessing threat scenarios.

**Security Compliance Auditor**

Security Audit against internal & external security regulations.

SECURITY RISK MANAGEMENT METHODOLOGY

The OSRM-4 © consists of 12 Security Domains & 101 Security Performance Indicators, further hierarchically structured in more detailed security management activities.

The methodology was developed with the aim of supporting the end-to-end security risk management processes & is subject to continuous improvement. The current version of the methodology is OSRM-4 ©, version 4.

At the end of 2012 the OSRM-4 © was aligned with the ISO 31000 Standard, mainly on the basis of terminology.

The Optimit Security Risk Methodology (OSRM-4) © was developed independently of the ISO 31000 Standard but is largely based on the same principles, framework & processes.
